

MONSTER CLOUD SEARCH

Revolutionize your talent acquisition strategy

Only 6% of recruiters feel they have the necessary tools to easily identify quality candidates for their open requisitions.¹

What if you could increase recruitment ROI by quickly and conveniently finding the best candidates in your existing talent pool?

Introducing Monster Cloud Search, a semantic search platform that redefines the way you find and manage talent. Now you can see and search your resumes from any source.

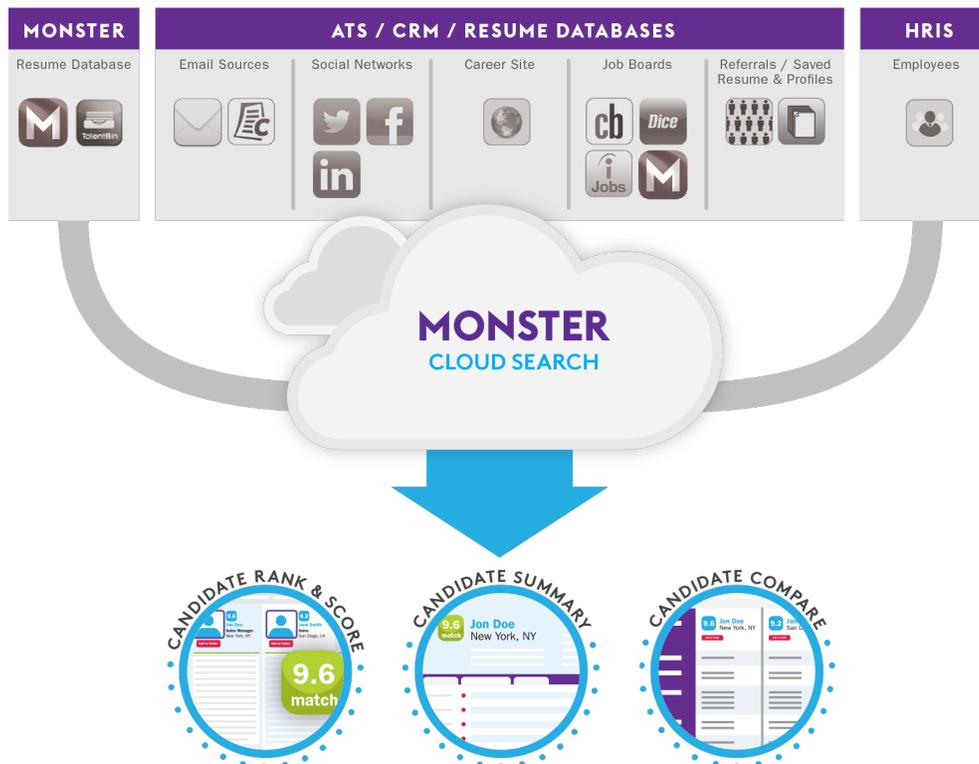

ACCESS THE TALENT YOU HAVE

Accessing all the talent available to you is challenging to say the least, especially when that data is located

in multiple databases. With Monster Cloud Search, we help you increase recruiter productivity by aggregating a copy of all your resumes no matter where they were sourced - from Monster, other job sites, social networks, referrals, or internal talent - in a single, secure cloud environment.

PINPOINT THE TALENT YOU NEED

Cloud Search features Monster's patented, award-winning 6Sense® semantic search technology—it intuitively understands the context of search terms—so you can search, compare, rank, and manage talent in a lot less time. All from your safe, searchable cloud. Cloud Search allows for precise candidate matching which means you find the right candidate for the right position the first time.

Only Monster can offer the targeting capabilities of semantic search cloud technology to identify qualified candidates instantly.

For more information, call your Monster representative or 1-800-MONSTER x6333 today.
